INTELLIGENT TRANSPORTATION

ARE YOU IN CONTROL?

Traffic Management Centers (TMC), Air Traffic Control (ATC) operations, Port Authorities and all other Transportation Management Systems have recently seen major technological advancements. The amount of information presented and processed by the operators can become overwhelming. In order to take advantage of these impressive new technologies it is imperative that the control room is properly designed and the consoles are ergonomically correct. A properly designed control room with ergonomically correct consoles can maximize operator comfort and improve health, which results in higher productivity, better morale and fewer mistakes.

For over 47 years, Winsted has been a worldwide leader in control room console solutions. Our experts combine the disciplines of industrial design, ergonomics and interior design to create solutions that are both efficient and eye-catching. We offer stock, customized and custom control room consoles for a wide range of Transportation Management applications. Whether you are building a state-of-the-art command center from the ground up, or simply need to upgrade your control room, we can provide the ideal solution.

Our commitment to customer service is second-to-none and your satisfaction is guaranteed.
